

# Mobilunity DevOps Consulting Services

Pay hourly rate for our Consultants' expertise to stay flexible.

# Mobilunity Consultancy Model in a Nutshell

Consultancy Services provided by Mobilunity is a part-time and hourly-based engagement model of diverse specialists: from top-level SRE advisors to CI/CD environment configuration experts. By opting for this model, businesses get **customized, part-time, available on need expert-level DevOps consultancy** 100% corresponding to their needs.

# Dedicated Development Teams **VS** Consultancy Model

	DDT (Dedicated Development Teams )	Consultancy Model
Engagement of specialists	Full-time engagement.	Part-time, hourly engagement.
Pricing model	All-inclusive <b>monthly</b> price, which includes vacation, sick leaves, hardware, and more	Cost is based solely on the <b>hourly</b> rate of the specialist and based on the hours worked.
Project duration	From three months and usually lasts for years. Long-term commitment.	Starting from one month and doesn't require long-term commitment.
Legal setup	The contract is signed between the client and Mobilunity, which legally binds 2 parties.	
Control over the team	Direct work with specialists, and 100% control of the team.	Direct work with specialists according to the agreed hours of involvement.
Schedule	Developers working <b>in the Kyiv office</b> (or remotely, depending on the situation with the lockdown in the country) and <b>full-time</b> , as per working hours schedule agreed once.	Mostly <b>remote</b> and <b>part-time</b> . Consultants' schedule is flexible and should be agreed on every occasion.
Payments	Payment is done monthly for the team engaged into the project.	Payment is done on an hourly basis with an advance payment system: once the prepaid hours are used, the new payment is requested.
Notice period	2 weeks while on trial (which lasts for 3 months) and one month after the trial closure.	As short as 1 day.

# Mobilunity Consultancy Model Is a Great Fit for

Companies with shorter term projects.

Projects with ad-hoc need for a specific consultant.

Projects requiring pure consultancy of a Senior-level specialist by request.

Businesses without permanent need for a specific expertise.

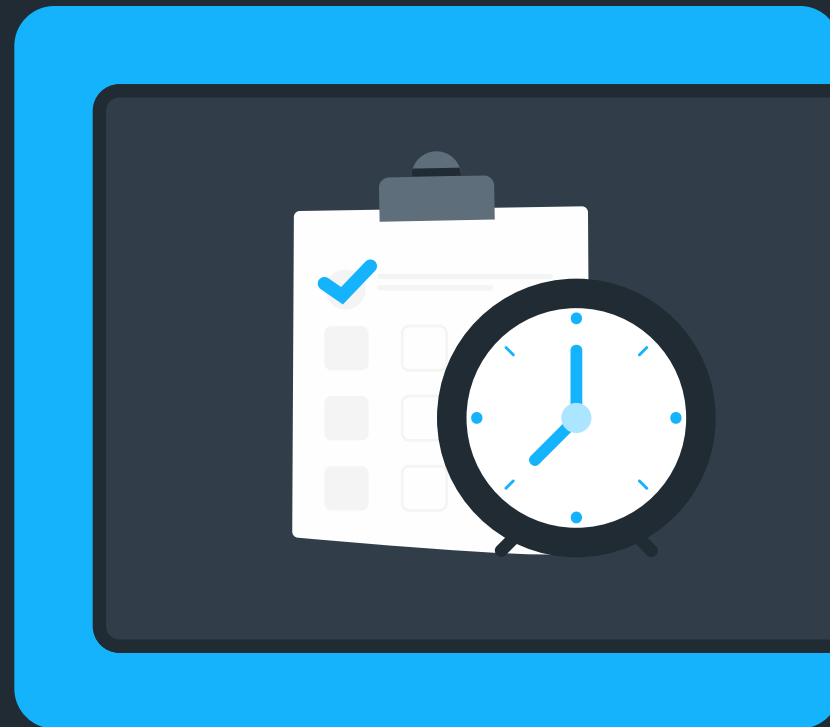

Projects with solid processes already working, to increase the velocity by adding more manpower and/or cover peak loads on a project.

# Mobilunity Consultancy Model

## Main Advantages

Pay only for working hours,  
no additional expenses.

**Instant access to the  
Senior-level specialists.**  
Find experts with rare skills.  
As our experience shows,  
such specialists are easily  
engaged in Consultant roles.

No long term commitments.

## Anna Ivanchuk

Senior Business Development Manager at Mobilunity

***We are definitely witnessing a growing demand for the consultancy model from both our current clients and potential ones.***

*The way our clients see it, it is not only a good way to have a person with a very specific area of expertise to help in times of need, or to get a hand in covering the tasks when your tech team is swamped with work, but is also a great opportunity to try on the vendor before scaling up your cooperation to a full- time dedicated development team.*

# How DevOps Consultants Can Help Your Business

DevOps consultants are able to tackle variety of tasks including:

## Platform status analysis

Our consultants provide quality analytics over your existing systems with the help of various tools, techniques, and procedures to resolve problems.

## Infrastructure cost optimization

We are able to source the experts, who know all the tricks of cloud services pricing models, and thus, help to analyze and optimize the costs.

## System maintenance

DevOps consultants ensure the proper application performance and system availability - from initial setup to current status analysis.

## Planning, testing, and development

DevOps are able to consult on common topics like infrastructure planning, testing, and development.

## CI/CD

Especially for new applications set-up, part-time DevOps are able to configure continuous integration and continuous delivery for your development team.

## Load testing & auto-scale

Ask DevOps to track end-user analytics & app metrics to adapt infrastructure as well as ensure optimal performance.

## Monitoring

DevOps will help your team to intensify the deployment process by configuring full monitoring and ensuring everything is rolled out in a continuous manner.

## Incident management

DevOps may help with investigation of incidents in production; such examining leads to fewer incidents and automates troubleshooting.

## And many more!

# Mobilunity DevOps Consultants Available

# Danish Booming Educational Platform

PRODUCT  
Educational Platform

TECH STACK  
Docker, MySQL, GitLab GitLab

Our client is one of the foremost providers of courses on a variety of topics for professional training. They help people around the world to raise their chances of getting a new job.

## CLIENT'S NEEDS:

Our client was looking for a person who could examine and evaluate how the infrastructure on the project is set up and, if necessary, intervene and reconfigure.

## OUR SOLUTION:

CONSULTANT

Part-time DevOps with CI/CD experience

COMMITMENT

60 hours

We organized a virtual meeting between a Senior DevOps and the client to refine the list of requirements and create a job description for this specific task. Within a few weeks, we were able to engage a part-time DevOps, who did a full evaluation of the current project and suggested several ways how the deployment process could be optimized. After assessing all costs, pros and cons of each solution, our client found the optimal way to proceed and the DevOps consultant implemented the agreed changes.

# Belgian Innovative Knowledge-Sharing HR Startup

PRODUCT

Knowledge-Sharing HR Platform

TECH STACK

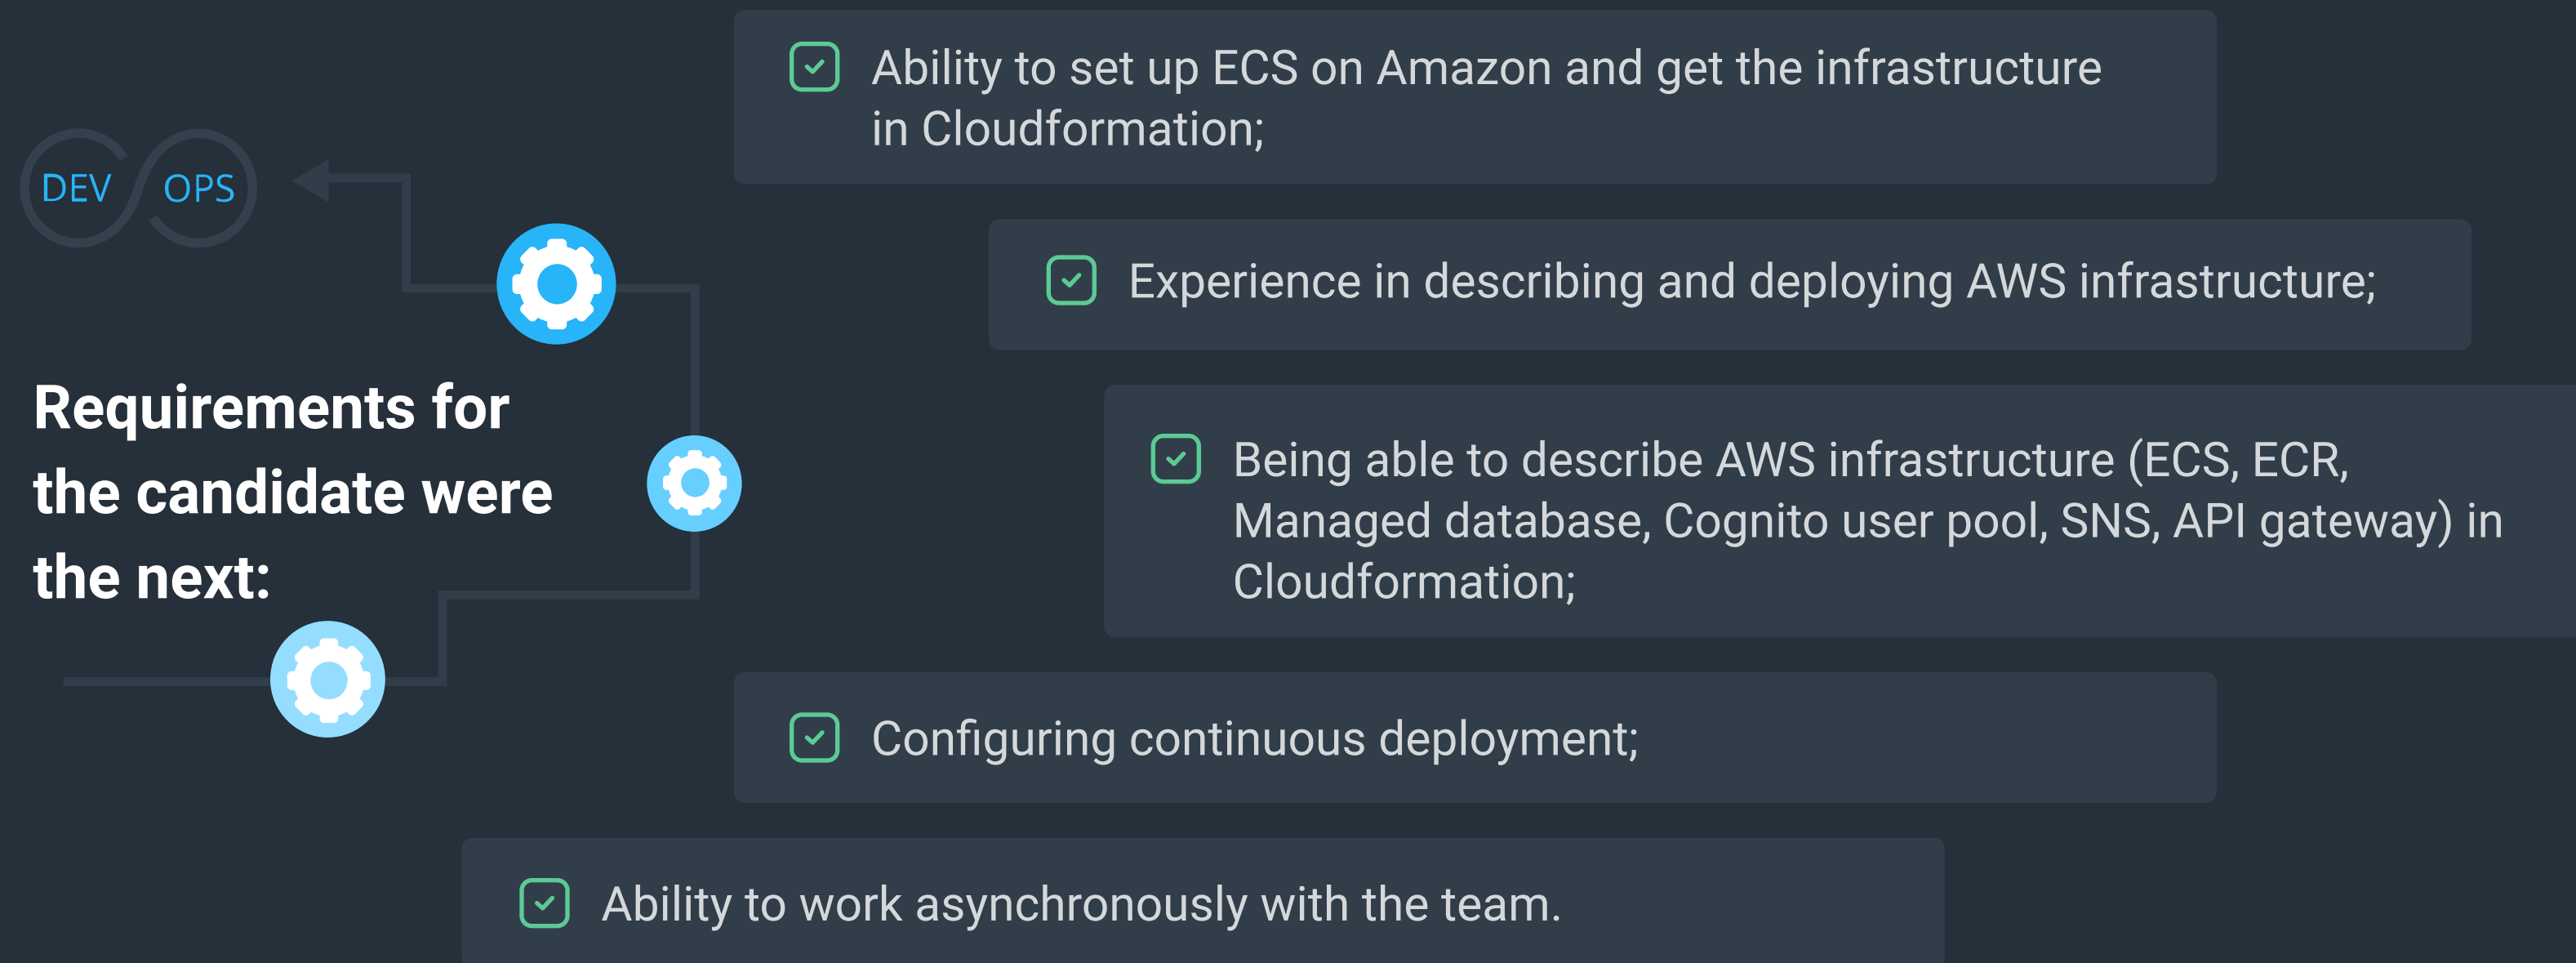

Jenkins CI/CD, AWS, Cloudformation

Our client is a fast-growing company specializing in all-around HR services aiming to help people find prospective job opportunities promptly and efficiently.
